

Smart Led Light Strip Sonoff L3 Pro 5m

Smart Led Light Strip Sonoff L3 Pro 5m

Ref: 6920075777345

Smart Led Light Strip Sonoff L3 Pro 5m

Give your room a splash of color with the LED tape from Sonoff! L3 Pro is equipped with 150 LEDs and offers up to 44 intelligent scenes. Therefore, you will successfully use it during many occasions. You can also adjust the color temperature and brightness, and it supports synchronization with music. In addition, it works with voice assistants.

RGBIC backlighting

The L3 Pro ribbon uses RGBIC backlighting, which means that each LED supports IC control. This allows them to glow different colors at the same time. In contrast, standard RGB backlighting allows only one color to be displayed along the entire length of the strip. Take care of a unique atmosphere with Sonoff!

Customize its operation to suit your needs

A family dinner, a garden party, a romantic evening - in these and similar situations, the Sonoff smart tape will work. The product offers as many as 44 smart scenes, so it will meet different user expectations. You can set them from the app and adjust their speed. For even greater freedom of use, take advantage of the timer function - the tape will stop working at a time of your choosing.

Perfect for a party

Are you organizing a party? A smart tape from Sonoff will come in handy! The L3 Pro has a built-in microphone with high sensitivity. This allows you to synchronize the device with the music. All you have to do is turn on Music mode.

Simple and convenient operation

Operating the L3 Pro will not cause you any problems. The device works with voice assistants such as Amazon Alexa, Google Assistant and SmartThings. With just the right command, you can change the scene, set the brightness or color temperature. In addition, you can also control the ribbon via the eWeLink app or a switch.

Easy and quick installation

Mounting the L3 Pro will take you just a moment. All you have to do is peel off the tape and stick it in the desired location. You can also adjust its length to your needs - just trim it with scissors. In addition, it is distinguished by its durable construction. The tape has been coated with a protective layer, which makes it resistant to splashes and moisture.

User-friendly

This is not the end of the L3 Pro's advantages! The smart LED strip can be powered by a mains charger, powerbank or laptop. A USB-C cable is included to connect the tape to your device. Enjoy the convenience of using it with Sonoff.

Included

Smart LED ribbon

Switch
