Ref: 5907489608299

Mechanical gaming keyboard BlitzWolf, BW-KB2, Red switch (RGB)

BlitzWolf BW-KB2 mechanical gaming keyboard
Are you looking for a gaming keyboard that will give you smooth performance while not taking up too much space on your desk? BW-KB2 will be an excellent choice! The device is equipped with 87 keys with Gateron Red switches and supports anti-ghosting. With its colorful RGB backlighting, it stands out with a unique style. The keyboard's buttons are fully programmable - you can customize them with special software.

Ideal for gamers
The BW-KB2 keyboard is equipped with 87 keys. This makes it compact enough to fit easily even on a small desk. There are up to 12 multimedia keys, which make working with the computer much easier. The keyboard also supports anti-ghosting, so you can press several keys at the same time without fear of conflict. With BlitzWolf you can easily perform even the most complex attack and defeat your opponents!

Gateron switches
What makes the keyboard work so well? The device uses excellent quality Gateron Red switches, which provide incredibly fast response times and smooth, fast operation. The mechanical design and high profile guarantee fantastic responsiveness and precision movements. With BW-KB2 you gain an advantage right from the start!

Colorful backlighting

BlitzWolf BW-KB2 keyboard is an ideal choice for e-sports enthusiasts. It impresses not only with its reliable performance, but also with its stylish, modern design. It is equipped with colorful RGB backlighting, which you can freely adjust to your liking using dedicated software. Opt for an original gaming style and ensure a unique atmosphere in your gaming zone!

Wide compatibility

The keyboard connects to your computer via a USB-C cable, which ensures reliable signal transmission and stable operation. The device also stands out for its wide compatibility. It works seamlessly with popular operating systems such as Windows, Mac OS and iOS. No matter what kind of hardware you're playing on - with BlitzWolf you'll ensure a straight path to victory!

Programmable buttons

Now you can further customize the keyboard to suit your needs and habits. BW-KB2 keys are fully programmable. With the help of special software it is possible, for example, to change the backlighting style. It is also possible to program macros - this way you will make it easier to perform complex combinations of attacks. You can even change the keyboard layout!

Refined in every detail

Ensure your comfort for many hours of gameplay. The keyboard stands out for its well-thought-out ergonomic design, so you don't have to worry about wrist pain or fatigue. Sturdy supports and non-slip pads give the device more stability and ensure that it won't slide on the surface of your desk. In addition, the visible markings on the keys are clear and resistant to abrasion.
