Outdoor IP camera Blurams S21C

Ref: 6972127490771

Blurams S21C outdoor IP camera

Are you looking to increase the level of security in your home? Choose the Blurams S21C camera, which provides high-resolution 2K video and color monitoring at night. It is equipped with a dual lens, supports up to 9x digital zoom and rotates 320° to track movement. What's more, when the device detects the presence of an intruder, it will immediately notify you via the app. The camera is also distinguished by its IP66 waterproof rating. It is also compatible with Google Assistant, Amazon Alexa, Siri and IFTTT.

High image quality day and night

Don't let any detail escape you. The camera is equipped with a dual lens and can provide high-quality 2K images. It also has 4 built-in IR LEDs to capture color video at night as well. Up to 9x digital zoom is also available. What's more, the camera rotates 320° horizontally and 110° vertically. This means it allows you to cover a larger area - now nothing important will escape your attention.

For the sake of security

The camera intelligently detects motion and sound. This means that if someone appears in your home or garden, the device will immediately send you an appropriate notification. You can also remotely activate a siren or light alert to scare away a possible intruder and warn your household members. This will help you take better care of your security! The S21C also enables automatic motion tracking - if an unwanted person is found in your home, it will record valuable evidence that you may need later.

Hassle-free video storage

Has your camera recorded something important and you don't want to lose the footage? You have no reason to worry - along with the device you get a month of free access to the cloud, and after that period you can purchase an additional Standard or Premium plan. You can also store files locally, on a microSD card with a maximum capacity of 128GB (not included).

Refined design

The Blurams S21C camera will work perfectly both indoors and outdoors. It is distinguished by its IP66 waterproof rating, so it will not be intimidated even by extremely harsh weather conditions. Rain, wind, snow, heat - almost nothing poses a major threat to it. Also noteworthy is the seamless installation of the device. You can connect it via Wi-Fi or via an Ethernet cable.

2-way audio

The S21C will not only make it easier for you to increase security at home, but also to communicate with guests or other family members. The camera has a built-in speaker and microphone, so it supports 2-way audio. So with its help you can conveniently call a child from the garden for dinner, greet friends who have arrived for a birthday party or ask a courier to put a package in front of the door.

Facilitated operation

Enjoy convenient remote operation of the camera. Seamless management of the device is enabled by the Blurams app, which you can use on your smartphone or computer. It provides easy access to the most important functions of the S21C and allows you to change settings efficiently. It is also possible to operate the camera by voice - the product is compatible with Google Assistant, Amazon Alexa and Siri. With just the right command, for example, you can see a preview of the garden!
