

Wireless Bluetooth speaker EarFun UBOOML

Wireless Bluetooth speaker EarFun UBOOML

Ref: 6974173980152

EarFun UBOOML Bluetooth Wireless Speaker

Take your favorite music anywhere you want! The Earfun speaker offers high-end sound, thanks to its 55mm drivers. The UBOOML is also distinguished by its 28-watt power output and stable Bluetooth 5.0 connectivity, plus it is IPX7 water resistant for greater freedom of use. Convenient buttons and voice assistants are responsible for simple operation. Check out what else it can surprise you with.

Impressive sound

A garden party, a camping trip, a bike ride, a meeting with friends - in these and similar situations the Earfun speaker will prove its worth. The device features 55mm drivers and dual passive radiators, offering richly detailed sound. In addition, advanced digital signal processing (DSP) algorithms and a total power of 28 watts further contribute to the sound quality. You also don't have to worry about distortion at higher volume levels.

Customize its performance to suit your needs

The speaker is equipped with 3 modes of operation, so you can adjust its performance to your own needs. Indoor mode provides a rich low-end sound, while Outdoor mode will work well in noisy environments, delivering sound at a higher volume level and longer runtime. You can also use the Video mode.

Carefully considered design

For greater freedom of use, the Earfun speaker features IPX7 water resistance. You can successfully take it on a seaside vacation or a pool party. What's more, when you drop it into water, it will float to the surface. In addition, the use of high-quality materials is responsible for the product's durability and resistance to dust and drops.

Even more possibilities

This is not the end of the Earfun speaker's advantages. The device has a built-in microphone, which allows you to conveniently talk on the phone. You can also connect 2 UBOOML speakers and enjoy even more powerful sound. Meanwhile, Bluetooth version 5.0 is responsible for fast and stable connection.

Convenient operation

Operating the Earfun speaker will not cause you any problems. The device has a control panel with which you can turn the UBOOML on/off, skip a song or set the volume. You can also choose from 3 modes of operation. In addition, the product is compatible with Amazon Alexa, Siri and Google Assistant voice assistants. With a simple voice command, you can customize the speaker's performance.

Long runtime, extra ports

Worried that the speaker will suddenly run out of power? Don't be! The device has a 5200 mAh battery, which allows for about 16 h of operation on a single charge. A cable is included for easy charging. Special indicators will inform you about the battery level and the selected mode of operation. In addition to the USB-C port, the speaker is equipped with a 3.5mm AUX input, so you can connect other devices to the UBOOML.
