Wireless Gamepad iPega Spiderman PG-SW018G NSW BT (white)

iPega NSW BT PG-SW018G Wireless Controller / GamePad

The iPega NSW BT PG-SW018G gamepad is a wireless controller with a visual theme of the Spider-Man universe. It features a 6-axis gyroscope and a dual vibration motor for smooth and satisfying operation. What's more, the turbo function will help you when you need to press a button multiple times in a row, and the 360-degree pleasant-touch analog knobs will take care of your comfort. The controller is compatible with the Nintendo Switch console, PlayStation 3 and Windows, and Android devices.

Functionality first and foremost

Thanks to its dual vibration motor and 6-axis gyroscope, the gamepad will enhance your gaming experience and take immersion to a whole new level. What's more, it has 4 additional programmable buttons, the purpose of which you choose yourself. Bet on the convenience of use, without sacrificing quality!

Speed and precision

The controller has a TURBO button, which, when paired with the second selected button, allows you to switch to combo mode. This means you don't have to press it again and again to get a continuous, repetitive effect. Make your gameplay easier and go through levels at bullet speed! What's more, analog knobs with 360-degree rotation will give you precise as well as comfortable control over the situation on the screen.

Design straight from the Spider-Man universe

The gamepad was designed to reflect the spirit of Spider-Man's styling as much as possible. The white color and ornaments reminiscent of a spider web enhance the visual appeal. What's more, the LED backlighting of the main button panel gives the device a gaming feel and makes it look really great.

The set includes
