

Case B&W Type 2000 for DJI Mini 3 Pro black

Case B&W Type 2000 for DJI Mini 3 Pro black

Ref: 4031541750464

B&W Type 2000 case for DJI Mini 3 Pro

Keep your drone and its accessories safe. The B&W transport case protects your equipment from dust and other debris. In addition, it is IP67 water resistant. It has been lined with foam, so you can be sure that the equipment inside will not be damaged. It also has a pressure equalization valve, which will come in handy when traveling at high altitudes and depths.

Solid construction

The product is made of polypropylene, which makes it resistant to falls. On the other hand, the inside has been lined with foam, which provides stability for the devices inside. It is also IP67 waterproof and dustproof - so no dirt will get into it. It also provides protection against harmful temperatures from -30°C to + 80°C. In addition, it has a special valve that allows you to use it in areas where there are large pressure differences.

User-friendly

Using the suitcase is extremely convenient. Specially designed latches allow it to open and close quickly. The rubber finish of the handle provides comfort and makes the product easy to carry. In addition to the drone, the case will also store a DJI RC-N1 or DJI RC controller and 2 batteries, or 3 - if you have a charging hub, which is available in the DJI Mini 3 Pro Fly More Kit. An additional pocket will accommodate smaller accessories.
