

Wireless Earphones TWS QCY T2C Bluetooth V5.0 (black)

Ref: 6957141406519

Wireless Earphones TWS QCY T2C Bluetooth V5.0 (black)

Truly wireless headphones

QCY T2C are TWS headphones, meaning they are not limited by any cable. They not only connect wirelessly to your phone or computer, but also to each other, creating stereo headphones. Compact, comfortable and elegant, the headphones will work at any time: on the bus, at home, at the gym.

Bluetooth 5.0 module

Thanks to an advanced Bluetooth 5.0 module, the headphones automatically connect to each other and to your device as soon as you take them out of the case. The Realtek module used also allows for free HD calls, longer battery life, and high-quality audio.

Smart power supply

When removed from the case, the headphones automatically turn on and pair, and when inserted into the case, they immediately turn off.

High-quality sound

Thanks to the professional SBC+AAC codec, the headphones deliver highly reproduced sound while providing enhanced bass, as well as great mids and highs. Thanks to their versatility, the headphones will meet the expectations of virtually any user.

Charging case

The headphones are charged by inserting them into the case, and the magnetic connection system and cover prevent them from falling out. The 800 mAh battery used allows you to charge the headphones 8 times without plugging the case into an outlet, providing an additional several hours of use. Thanks to its small size, the case can be taken virtually anywhere, putting it in a purse or pocket.

Noise reduction

The microphone used allows for stereo conversations. CVC6.0 technology is responsible for reducing ambient noise during a conversation, making the caller hear everything clearly. This is extremely useful when making phone calls at work or in public places.

Low latency

Thanks to the advanced Realtek module, the headphones have a very low audio transmission delay, which is practically imperceptible. This makes the headphones suitable not only for phone calls and listening to music, but also for watching videos and playing games.

Advantages of Bluetooth 5.0

Transmission speed is twice as fast as Bluetooth 4.2, power consumption is twice as low as Bluetooth 4.2, stronger and more stable signal, transmission range is 10 meters, provides smooth sound without delay.

Included

T2C headphones

Case with charging function

Rubber pads

Charging cable
