5-in-1 hair dryer-brush with ionization Kensen

Ref: 6953156300743

Kensen 5-in-1 hair dryer-brush with ionization

Choose the Kensen 5-in-1 hair dryer-brush with ionization and impress everyone with your beautiful hairstyle. The set comes with 5 different tips to curl, straighten, blow dry and style your hair. You no longer need to buy several devices - all you need is the CT-502 from Kensen. The product is designed not to damage hair and allows you to adjust the speed. You can also choose between hot and cool blowing. In addition, the use of negative ions protects your hair and prevents split ends.

Healthy, shiny hair

The device offers negative ion action, which helps reduce split ends and gives your hair volume and shine. What's more, the brushes are equipped with natural bristles and nylon pins, for extra protection.

Different usage scenarios

In the package, you will find 5 different tips to help you create the hairstyle of your dreams. Use the blow-dry attachment to dry your hair in no time, while the flat brush allows you to smooth it. The curling tip heats up quickly and provides beautiful curls. While the 2 round brushes allow you to achieve romantic waves.

Efficient operation

The Kensen 5-in-1 hair dryer-brush with ionization is equipped with a powerful motor and uses the Coanda effect. This means that the high speed and pressure create a vortex of air around the brush shaft that gently attracts, wraps and twists the hair at the same time without causing a pulling sensation.

Thoughtful design

The device is distinguished by its carefully thought-out design. The insulated tip makes it easy to change attachments and protect against burns, while the aerodynamic opening ensures good airflow. In addition, the 360° negative ion technology prevents electrification of hair, and the rubber insulation reduces the noise of the device's operation. What's more, the attachments are easy to install/remove.
