

USB-C adapter for Nillkin Magic Tags inductive charging (black)

Ref: 6902048128903

Nillkin Magic Tags USB-C inductive charging adapter (black)

The Nillkin Magic Tags Inductive Charging Adapter will allow you to wirelessly replenish smartphones with a USB-C port. It stands out for its thin, durable design and the use of the latest solutions and technologies.

Thoughtful design

The adapter is extremely thin, so it won't significantly increase the thickness of your smartphone. It has a USB-C connector to plug into the smartphone's port. What's more, it's waterproof and stain-resistant, and the flexible cable (FPC) with a reinforced tip ensures long life and durability.

High performance

Inside the device there is a copper coil, which perfectly handles conduction and heat dissipation. In the production of Magic Tags, materials were used that perfectly absorb electromagnetic waves, affecting the high efficiency of the charging process. The adapter can be used without removing the case from the phone.
