

MagSafe car holder with Qi inductive charger Nillkin Energy

MagSafe car holder with Qi inductive charger Nillkin Energy W2 (black)

Ref: 6970018350463

MagSafe car mount with Qi inductive charger Nillkin Energy W2 (black)

Equip yourself with a practical car mount that keeps your phone stable while traveling, while also allowing 7.5W wireless charging. You can mount the holder on both the air vent and the dashboard, plus its design allows you to maneuver your phone's position 360°C.

Mounting in two ways

The Nillkin Energy W2 car mount with charging function can be mounted on both the air vents and the dashboard. You'll find a clip with which to attach the holder to the grille, as well as a stand and a sticker with strong 3M adhesive for mounting on the dashboard. The choice is yours.

Convenient operation and fast charging

The mount's design means that you can freely maneuver its position and use your phone both vertically and horizontally. The ability to renew energy quickly is also a plus, as the holder offers Qi inductive charging. Importantly, the sturdy magnets provide a 900g attraction.
