

## Flashlight Superfire A10, 550lm, USB

Flashlight Superfire A10, 550lm, USB

Ref: 6956362901346

### Mini flashlight

Superfire A10 is a compact LED flashlight with high brightness and a range of 100-200 meters. The device is made of durable aluminum alloy used in the aviation industry. Thanks to its small size of 150 mm x 35 mm x 30 mm the flashlight will fit into your pocket, backpack, bag or even sachets.

### Fast charging

The flashlight is powered by one 18650 battery (included). The battery can be recharged very quickly using the USB port, so there is no need to remove the battery from the flashlight. You don't need a special charger to charge the flashlight - just plug the USB cable into the powerbank, charger or computer. When using the flashlight, the battery charge status is indicated by the LED backlight: green color indicates that the battery charge level is sufficient; red color indicates that the battery needs to be charged. While charging, a red flashing light indicates that the battery is charging, and when the level reaches 80%, the light will turn green.

### High brightness

The flashlight lights with a brightness of 550 lumens at 7 watts, provides strong light and has a long life, so you do not have to worry about frequent diode replacement. The flashlight has 5 modes of light. 3 modes are used to control the brightness (strong, medium, weak), and the other two are used to turn on strobe light or SOS. The flashlight switch is used to switch between the modes.

### Functionality

The flashlight is splash-proof with IP44 protection class and can also be used in light rain. The flashlight has a hole for attaching the strap and the stroboscopic light can be used to dazzle an attacker in a health / life threatening situation.

### Packing list

Flashlight

18650 battery

USB cable
