

Flashlight Superfire F3-L2, 570lm

Flashlight Superfire F3-L2, 570lm

Ref: 6956362904019

Mini flashlight

The Superfire F3-L2 is a compact flashlight that you can take anywhere with you. It will fit in your pocket, backpack, purse or even sachets. The flashlight is made of very durable aluminum, characterized by high resistance to damage and wear and optical glass.

Fast charging

The flashlight is powered by one 18650 or three AAA batteries (batteries are not included in the packing list, and you have to purchase them separately). The battery can be charged very quickly using the supplied USB charger.

Strong light

The powerful Luminus SST-40-W provides strong light and has a long lifetime, so you do not have to worry about frequent diode replacement. The light has a brightness of 570lumens and its range is 260meters. The flashlight has 5 modes of illumination. 3 modes are used to control the brightness (strong, medium, weak) and the other two are used to turn on the strobe light or SOS. The flashlight switch is used to switch between modes.

Waterproof

The flashlight is splash-proof, it can also be used quietly in rain or other wet conditions. During normal use, this is quite sufficient.

ZOOM function

The Superfire F3-L2 has the ability to focus the beam by extending the head of the flashlight, so that we can see the illuminated area very precisely.

Packing list

Flashlight

18650 battery

Charger
