

Wi-Fi Smart Power Meter Switch Sonoff POWR320D

Wi-Fi Smart Power Meter Switch Sonoff POWR320D

Ref: 6920075777505

Smart power meter switch Sonoff POWR320D

Conveniently manage your home appliances without getting up from the couch! The Sonoff POWR320D smart relay allows you to remotely control your appliances using apps or voice assistants. It allows you to track accumulated data, as well as set specific values for daily, weekly or monthly energy consumption. It is also equipped with overload protection, and its maximum load current is 20A for resistive loads.

Save energy and money

Set your own energy consumption parameters to reduce your electricity bills. You can easily adjust the values of daily, weekly, as well as monthly power consumption at home, for example - when the consumption target is reached, you will receive a notification on your smartphone. The switch also offers an inching mode, which automatically turns off appliances after a certain period of time each time. Saving money has never been easier!

A range of applications

The Sonoff brand switch will prove useful almost anywhere. With its help you will check, among other things, the monthly electricity consumption in a shopping center or a farm. You can also use it to control the daily energy consumption of your garage or swimming pool.

Tailored to your day

Adapt the devices connected to the switch to your daily schedule. The product is equipped with a timer, so you can set, for example, when you want the light to come on and when you want it to go off. What's more, the switch can work even without WiFi access - just use the LAN support function.

Even better access to information

Conveniently control the data collected by the switch. Connect the POWR320D to the eWeLink app to monitor it from your phone! You can also install a dedicated add-on on your laptop to see which appliances are on or check the energy consumption of your apartment. In addition, the relay stores the accumulated data for up to 6 months - if you want, you can successfully export it and save it on your phone. The device also has a built-in LCD display, which keeps you informed about the total power consumption, the current power and current consumption of the receiver, among other things.

Voice control

The smart switch works with Google Assistant and Amazon Alexa voice assistants. With just a few words, you can conveniently control your connected devices! You don't even have to get out of bed to turn off the lights. What's more, the product is also compatible with IFTTT and the Alexa Energy Dashboard software, which allows you to keep track of your electricity consumption.

The ultimate in security

Use the Sonoff smart switch without worrying about safety. The device is equipped with advanced overload protection, which will automatically turn off the connected equipment when the set current values are reached. In addition, the housing of the device is made of high-quality PC material, which provides effective protection against fire.

Included

smart switch
