

Headlight Superfire HL06, 500lm, USB

Headlight Superfire HL06, 500lm, USB

Ref: 6956362901797

Superfire HL06 headlamp, 500lm, USB

The Superfire HL06 is a compact headlamp that you can take anywhere with you. It will fit into your pocket, backpack, purse or even a pouch. The headband allows you to put the flashlight on your head and use it when you need both hands free. In addition, thanks to the flashlight's 60-degree adjustable position, we can adjust the angle of the light to suit our needs.

Touch-free switch

The flashlight is equipped with a touchless switch, which allows you to turn on the flashlight by waving your hand in front of the flashlight. This feature comes in handy especially in situations where we have dirty hands or worn gloves, which make it much more difficult to press the switch.

Fast charging

The flashlight is powered by a single 1200 mAh battery. The battery can be quickly recharged using a micro USB port. You don't need a special charger to charge the flashlight - just plug the micro USB cable into a powerbank, charger or computer. During charging, a red backlight indicates that the battery is charging, and when the battery is charged, the light will turn green.

Powerful light

The powerful US Cree XPG2-R5 LED provides powerful light and features a long life, so you don't have to worry about replacing the LED often. The light has a brightness of 240 lumens and has a range of 200 meters. The flashlight has 5 light modes. 3 modes are used to control the brightness (strong, medium, weak), and the last two to turn on the red light. The flashlight switch is used to switch between modes.

Waterproof

The flashlight is splash-proof, also you can safely use it in the rain or in other wet conditions. During normal use, it is completely sufficient.
