Ref: 5905316140110

Darkflash K2 computer case (black)

The Darkflash K2 computer case offers virtually unlimited possibilities. Its design allows the installation of a powerful cooling system, and the tempered glass side panel promotes the display of backlight-based components. The K2 model has 7 slots for expansion cards and an interface with a USB 3.0 port.

Thoughtful design

The side panel of the case is made of tempered glass. This favors the display of components equipped with backlighting, emphasizing the gaming character of your configuration. What's more, it stands out with a modern finish, which further enhances the visual appeal of the hardware.

Optimal cooling

Optimal cooling is the key to proper computer performance - especially during gaming sessions, which consume a lot of hardware resources. The case can accommodate up to 7 (120mm) fans or 4 120mm fans along with 360mm water cooling. In addition, the specially designed design perfectly dissipates heat, taking care of free airflow.

More amenities

You can place up to 2 HDD or SSD drives in the case. Choosing the K2 model, you will also gain access to an interface with a USB3.0 port, which features outstanding speed. And when you want to expand your hardware configuration, 7 expansion card slots will help.
