Ref: 6932172610821

Powerbank Baseus Bipow Pro, 10000mAh, 20W (black)

The Bipow Pro powerbank has a 10000mAh battery and a total power of 20W. It supports fast charging technology and allows you to charge up to 3 devices simultaneously. Multiple security levels effectively protect your equipment. Its compact size and light weight means you can take it with you anywhere. A USB-USB-C cable is included in the set.

Fast charging technology

The Baseus device supports fast charging in PD, QC 3.0 and AFC standards. Thanks to this technology, you will charge your iPhone 13, Samsung Galaxy S22+ or Xiaomi 12 in no time! What's more, with the help of the powerbank you will supply energy not only to your smartphone - you can also charge your wireless headphones or tablet without any problems. In addition, you will find a practical USB-C cable in the set.

Capacious battery

The Bipow Pro powerbank is equipped with a powerful 10,000 mAh battery, which allows you to charge your phone several times! Recharging the battery does not take long - after 3-4h the powerbank will be ready for use again. You can easily power it up with a compatible mains charger. In addition, you will find a built-in digital screen on the case, which provides real-time information about the battery charge level in percent.

Charge 3 devices at the same time

Share the powerbank with your family or friends! The device has 3 USB input ports that you can use simultaneously. So you don't have to wait until you've charged one device to plug in another! The product features wide compatibility - it works with most USB-A/USB-C powered devices available on the market. In addition, it allows emergency charging of laptops with up to 20 watts of power.

Multi-level protection

Don't be afraid of scratches or damage! The powerbank is made of durable materials that are fully resistant to wear and tear. It has passed a number of safety tests and provides effective protection against overcharging, discharge, overvoltage, overheating, overcurrent or short circuits. It has a smart NTC temperature sensor that detects the temperature of the power supply and automatically adjusts the power. You can also easily take it with you on a plane, as it meets all aviation requirements.
