Baseus Bipow Pro Powerbank, 10000mAh, 22.5W (black).

Power up your smartphone with energy, no matter where you are! The Baseus Bipow Pro powerbank has a capacious battery - 10,000mAh and supports fast charging technology. The small size and weight make it easy to transport, while a number of safety features provide comprehensive protection.

10000 mAh capacity

The Bipow Pro powerbank has a 10000 mAh capacity battery with 22.5 watts of power. It allows you to charge your phone multiple times in a short period of time. This makes the device perfect for, among other things, a long train trip. You can charge the powerbank itself in 3-4 hours with a compatible mains charger. What's more, it has been equipped with a digital screen, which keeps you informed about the battery's charge level.

Instant charging of your smartphone

The device supports fast charging with Power Delivery, Quick Charge 3.0, Samsung AFC and Huawei SCP standards. You will be able to instantly power up popular smartphones on the market, including iPhone 13 Pro, Samsung S20 Ultra or Huawei Mate 40 Pro.

Simultaneous charging of 3 devices

With the Baseus Bipow Pro powerbank you can charge up to 3 devices at the same time. The portable battery pack has three input ports that are compatible with most devices that are powered by USB-A/USB-C. The device will not only allow you to charge your smartphone, but also provide power to, for example, a wireless speaker or a lamp.

Convenient transportation

Compact size and extremely low weight make it easy to fit it into your purse, backpack or luggage - it won't even feel its presence! You can safely take it with you on a plane, as it meets the required aviation standards. In addition, you will find in the set a practical USB-C cable, which is sure to come in handy while traveling.

Reliable and safe performance

The case is made of extremely durable and resistant to any damage. A special control chipset adjusts the current to the connected device effectively protecting it from damage. Multi-level protections guarantee protection against overcharging, over-discharge, overvoltage or overheating, among other things.
