Joyroom Bluetooth 5.3 AUX Receiver JR-CB1 (gray)

Joyroom's Bluetooth 5.3 receiver will make your car trip even more enjoyable! The device allows you to listen to music wirelessly and make phone calls without operating your phone. The convenient control panel makes it easy to operate, and the built-in led screen informs you about the battery charge status. Thanks to its compact size and lightweight design, you can take it with you anywhere.

Stable transmission

The JR-CB1 has an advanced Bluetooth 5.3 chip and supports HSP/HFP/A2DP/AVRCP protocols. As a result, you can enjoy excellent sound quality without lag and reliable signal transmission up to about 12 meters. The Joyroom receiver allows you to connect as many as two devices simultaneously using Bluetooth.

Compatible

Thanks to the Bluetooth 5.3 connection, you can freely pair the receiver with any phone, tablet or laptop. In addition, the device has a 3.5 mmm AUX port, so you can also use the AUX cable (included) to connect the transmitter to headphones, speakers, car radio or amplifier.

Long operating time

The receiver is equipped with a 300 mAh battery, which allows for up to 22 hours of operation. You can charge the device using the USB-C cable you'll find in the package. It only takes 2 hours for the device to be ready for use again. The product has a built-in LED display that keeps you informed about the battery's charge status. So you don't have to worry about the transmitter discharging at the least opportune moment

Practical details

The Joyroom receiver has been equipped with an intuitive LED panel that will make it easy to use, without having to install an additional application for your phone. With its help you can, among other things, change songs, turn up or down the sound or answer calls. The set includes a practical metal plate, thanks to which you can easily attach the device to the cockpit of your car.
