

Power supply SkyRC eFuel 30A/540W

Power supply SkyRC eFuel 30A/540W

Ref: 6930460000972

SkyRC eFuel 30A/540W power supply

The 540W power supply supports 12-18V output and has built-in PFC which is an important aspect in all power supplies. The eFuel is ideal for high-voltage and three-port chargers, as well as other devices. The 100-240-volt power range allows for universal use without the need for DC port settings. High power and functional design allows you to take the power supply on the go and into the field.

Functionality

The dual DC port supplies up to 30 amps. With this design, the power supply gives you multiple power options. Also located on the right side of the power supply are two USB ports for powering external devices (such as a smartphone MP3 player or tablet). On the left side, in turn, is the main power switch.

Simple operation

The eFuel power supply model has a convenient knob for adjusting the voltage from 12 to 18 volts. In turn, the easy-to-read LCD screen displays the current output voltage and current, which makes it much easier to operate the power supply. The universal AC 100 - 240 V power supply makes the power supply usable worldwide without the need for power adapters.

PFC input

Active PFC input means less interference with AC power supply. It is the circuit responsible for changing/correcting the power factor value, that is, changing the phase shift angle between current and voltage. The phase shift between current and voltage causes reactive power to be emitted.

Included:

Power adapter

Power cable

☐Manufacturer

☐SkyRC

☐Model

☐SK-200013

☐Voltage

☐100-240 V/AC

☐Frequency

☐AC 50-60Hz

☐Output voltage

☐30 A \pm 1A

☐Short-circuit protection

☐ \leq 31 A 500 MS

☐Input

☐Fuse 10 A Fuse

☐LCD screen

☐ \pm 0.3V

☐Efficiency

☐89%

☐Temperature protection

☐
