Submersible pump INGCO SPC4001 117L / min

Ref: 6925582143478

Submersible pump INGCO SPC4001 117L / min

The INGCO SPC4001 submersible pump will allow you, for example, to pump water out of a flooded basement or empty a swimming pool. It will be ideal for households and beyond. It is distinguished by a power of 400W and a maximum flow of 117l/min. It is designed for pumping clean water, but can handle dirt up to 5mm in diameter. It also features IPX8 protection and a maximum head of 8m.

Efficient, trouble-free operation

A high-quality motor with a copper wire is responsible for the reliable operation of the pump. Its power reaches 400W, and its float is up to 117l/min. The device is also relatively easy to operate. It is equipped with a float switch, and its maximum submersion depth reaches 7m. To work it requires a space of at least 60x60cm - it will not take up too much space.

Various applications

Thanks to its high capacity, the INGCO SPC4001 pump will work well in many applications. It is designed for pumping clean water or water with fine impurities up to 5mm in diameter. With its help, for example, you can pump water out of a flooded basement or garage, as well as empty a swimming pool or tank. In addition, the long 9-meter cable will give you more freedom and allow you to use the pump in different situations.
