

Electric multifunction pan Techwood TP-3034 (black)

Electric multifunction pan Techwood TP-3034 (black)

Ref: 3760301551966

Techwood electric multifunction pan (black)

Pizza, grilled vegetables and meat, tart - you will prepare these and other dishes with the Techwood electric frying pan. TP-3034 is distinguished by a diameter of 30 cm, and its depth is 4.3 cm. This allows you to prepare a meal for the whole family. It is equipped with a non-stick coating, and you will also find a glass lid and a thermostat with a power supply. The device will find its use in small catering establishments, camping and anywhere where there is not enough space to install an electric cooker.

Convenient food preparation

The Techwood frying pan is large enough to prepare a meal for a larger number of people. What's more, it offers frying, grilling and roasting functions - you only need one appliance for this. In addition, the non-stick coating will make it easy to fry and keep the pan clean, and the insulated handles eliminate the risk of burns. You'll also find a glass lid included to speed up the cooking process and prevent grease splattering.

Customize its operation to suit your needs

The set includes a thermostat with a power supply, with which you will adjust the temperature depending on the type of food you are preparing. A temperature of 100°C - will work well for roasting meat, and 150-200°C you will use when frying pancakes, eggs or bacon. And the highest temperature: 240°C will be ideal for grilling or baking pizzas. Enjoy the freedom of use that Techwood offers.
