Sewing machine Techwood TMAC-1211

Ref: 3760301554080

Techwood TMAC-1211 sewing machine

The Techwood TMAC-1211 is a small sewing machine that is perfect for a variety of applications. It offers up to 12 stitches and allows buttonhole stitching. Also noteworthy are the free arm and the automatic thread winding function. The device weighs only about 2kg and has a built-in LED backlight. You can plug it in with a power adapter or use it wirelessly with 4 AA batteries (not included). You also get a pedal, an integrated thread cutter and a drawer.

Lots of possibilities

The TMAC-1211 machine will give you plenty of interesting possibilities. It lets you choose from 12 stitches, and also allows you to sew forward and backward. With its help you can also sew buttonholes. The device also offers a practical pedal and a free arm, which will make it easier for you to work on sleeves or legs, for example. All this will allow you, for example, to sew a tablecloth or repair a garment.

User-friendly

Now you can easily sew whatever you want. The Techwood sewing machine is very easy to use and offers an automatic thread winding function. It weighs only about 2kg and is equipped with a practical handle, which makes it much easier to carry. Also noteworthy is the built-in LED backlight, which will provide you with an additional source of light in your work area. The machine also has an integrated

thread cutter and a small drawer for storing needles or bobbins.

2 ways to power it

It is possible to power the machine in 2 ways. One includes a power adapter, with which you can simply plug it in. This is ideal when you are sewing at home! Are you going on vacation and taking the machine with you? Or maybe there is no free outlet nearby, and you need to sew something? No problem - you can use 4 AA batteries to power the machine (not included) and use it wirelessly.

Useful accessories included

The kit also includes several useful accessories that will make it easier for you to sew and use the machine. For example, in the package you will find a bobbin and a needle. With the device you also get a practical needle threader. Now you can make your work even easier and sew what you want with ease.
