Smart Led Bulb Laxihub LAE14S (2-pack) WiFi Bluetooth Tuya

Smart Led Bulb Laxihub LAE14S (2-pack) WiFi Bluetooth Tuya

The Laxihub LAE14S smart LED light bulb will create a unique atmosphere in your home. The product offers up to 16 million colors and 8 color scenes, so you can easily match the type of lighting to a specific situation. What's more, you can adjust the brightness level from 5 - 100%, use the timer function and create schedules. A dedicated app is responsible for convenient operation of the bulb, moreover, LAE14S is compatible with Amazon Alexa and Google Home, so you can control it through voice commands.

A unique ambience for any occasion

With the smart LED bulb, you can create the perfect ambience for a successful movie night, an unforgettable dance party or a romantic dinner. The bulb allows you to choose from 16 million colors, in addition, it offers 8 preset color scenes. You can also adjust its brightness level and adapt it to many different situations.

Convenient control

Want to change the type of lighting without moving from the couch? Just download the dedicated TUYA app, which is compatible with Android and iOS, and connect to 2.4 GHz Wi-Fi. What's more, the product works with Amazon Alexa and Google Assistant voice assistants - so you can conveniently control the bulb from within the app or with simple voice commands. The bulb also works with the Arenti and Smart Life apps.

To the rhythm of your favorite music

Do you like to spend time with friends and music is an integral part of your gatherings? The Laxihub LAE14S smart LED bulb will be great for your party, as it offers a function of synchronization with music and provides interesting lighting effects to the rhythm of your favorite songs. This is the perfect solution to surprise your friends and guarantee a successful party.

Tailored to your lifestyle

The LAE14S offers a schedule function, so you can plan its operation in advance. Just use the dedicated app and set the times you want the bulb to turn on and off. So you can fall asleep and wake up with soft lighting, without worrying about the light being on during the night.
