Water Fountain for pets Catlink Pure

Take care of your pet's health. The Catlink Pure smart fountain is an innovative device that will let you know your pet's habits. The drinker connects to an app, thanks to which you gain access to ready-made reports on cat/dog health. It allows you to detect alarming symptoms early and then prevent the development of diseases. In addition, it recognizes cats using the drinker and stands out for its carefully thought-out design.

Clean water

Have confidence that the water your pet is drinking is clean and safe for his health. Catlink Pure is equipped with a filter that purifies water from contaminants in it, such as hair, as well as calcium and magnesium ions, prevents limescale and odor. It also softens the water, protecting your furry friend from kidney disease.

For the sake of your pet's health

Catlink Pure can recognize the pets using the fountain around the clock, so you'll know the habits of each pet. The data automatically goes to the app, and a report will be generated based on it. In this way, you can track the health of your pet and prevent the development of possible diseases. Note: for the device to work properly, cats should wear the included collars and pendants.

Safety of use

The Catlink Pure smart fountain is designed to be completely safe to use. It will automatically turn off when the tank runs out of water, thus preventing damage to the device. In addition, it displays the amount of water in the tank and will remind you to refill it. This message will be signaled by a red indicator and a notification in the app (when its level is less than 25%).

More possibilities with the app

Download a dedicated app take full control of the device. From its level you can adjust the drinker's operation to your pet's needs, track the device's operation and your pet's health status. Catlink offers 4 modes of operation: Flowing pumps water every 30 minutes, and Eco - every 3 minutes. Meanwhile, Smart mode delivers water when the cat is detected, and then pauses when the cat moves away from the device. Additionally, Rinse pumps water for 20 seconds.

Thoughtful design

The ceramic bowl of the Catlink smart fountain is anti-bacterial and safe to use. What's more, the modular design makes it easy to clean. The unit is also resistant to water and corrosion, and the ABS plastic construction ensures optimal weight and provides stability. Meanwhile, the semi-circular cover makes it easy to keep clean and prevents water splashing. In addition, the device operates quietly (
