PC Water Cooling Darkflash DX240 V2 RGB 2x 120x120 (Pink)

PC water cooling DX240 V2 RGB 2x 120x120 (Pink)

Keep your computer's CPU temperature at the right level. The Darkflash DX240 V2 water cooler is equipped with 2 Darkflash Infinity 8 fans to efficiently dissipate heat. It is compatible with Intel and AMD processors, and its installation will not cause you any problems. The product also features a modern, stylish design - it offers colorful RGB backlighting and supports synchronization with the motherboard.

Efficient heat dissipation

You no longer have to worry about your computer's processor overheating. The DX240 V2 was built with top-notch materials. It was equipped with a large copper base, which perfectly dissipates heat. Also noteworthy are the corrugated fins, thanks to which it was possible to increase the efficiency area of the device. All this translates into more efficient cooling!

Efficient fans

The cooling uses 2 Darkflash Infinity 8 fans, which are equipped with 9 blades and are distinguished by speeds reaching 1800 rpm. Thanks to this, they can effectively keep the CPU temperature at the right level. You also don't have to worry about annoying noise. Special anti-vibration pads make the fans work surprisingly quietly. So you can work or play in peace!

Hassle-free installation

Don't waste your time on difficult, complicated assembly of computer components. The DX240 V2 cooling is very easy to install, and features compatibility with selected Intel and AMD processor models. It is also possible to synchronize the product with the motherboard. The possibilities are really great!

Reinforced tubes

Darkflash successfully combines aesthetics with functionality. The DX240 V2 cooling is equipped with a double tube covered with a durable woven material. This ensures greater safety of use - minimizing the risk of leaks, among other things. What's more, the solution used allowed to achieve a really interesting stylistic effect!

Colorful backlighting

The cooling is also distinguished by colorful backlighting, which gives it a unique gaming character, and in combination with the well-thought-out design of the water block and translucent fan blades guarantees fantastic visual effects. Want your hardware configuration to draw attention with even more interesting style? Use the DX240 V2 water cooling together with other components with RGB!

In the box

Water cooling

INTEL & AMD mounting kit

Mounting screws

Thermal conductive paste

PWM connector

User manual

Brand

Darkflash

Model

DX240 V2

Cooling type

Water

Color

Pink

Number of fans

2

Fan dimensions

120x120x25mm

Fan size

120 mm

Fan speed

800-1800RPM

Airflow

Approx. 51CFM

Maximum noise level

Approx. 32dBA

Dimensions of the radiator

274x120x27mm

Dimensions of the water block

78.5x70x54mm

Rotational speed

Approx. 2700RPM

Supply voltage

12V

Rated current

0.35A (max.)

Power consumption

4.20W (max.)

Connector

3Pin

Backlighting

ARGB

Compatibility

Intel: LGA 115x / 1200 / 1700 / 20xx (v3);AMD: AM4 / AM3(+)
/ AM2 (+) / FM2(+);

TDP

286 W
