Multitool Nextool NE20178 12 in 1 (silver)

Ref: 6973907631056

Nextool multitool NE20178 12in1 (silver)

When you're on a long-distance trip to the mountains, camping or vacationing in the woods, you never know what you might need. By taking the Multitool NE20178 from Nextool with you, you will ensure that at least 12 different needs are met. The Multitool brings together a Combiner, flat screwdriver, bottle opener, socket screw loosening capability, wire cutter, file, star screwdriver, can opener, small knife, key hanging capability and tool hanging capability, and small scissors. All bundled into one handy device that you can take with you anywhere.

Multitasking pliers

With stainless steel pliers, you'll be able to handle all small and larger repairs with ease. You'll use them to twist wire to improve fastening, loosen screws below M6 size, and cut copper wires up to 0.15 mm thick. They'll be perfect for minor electrical repairs, fence installation or when setting up a shack or working on a car.

Knife for small operations

The included knife will allow you to quickly peel fruits or vegetables when you are camping far from civilization. With it you can also sharpen sticks for a campfire, strip unwanted bark from wood, or the knife can become a great partner for mushroom picking - it all depends on your needs.

Do you tighten or saw?

Another unconventional combination will be a file, with the help of which you will also be able to unscrew or tighten flat screws. The file will not only allow you to take care of your nails, but will also blunt sharp ends, or allow you to make folding parts more compatible. In addition, it will help you open packages and packaging.

What else can you add?

Nextool will work great on any camping trip. It will allow you to open bottles or metal cans such as canned goods. A Phillips screwdriver will allow you to tighten loose screws in small appliances or field beds, and small scissors will come in handy when repairing clothing or making bandages. You can carry the multitool with you at all times - a ring will allow you to carry it with your keys or attached to your backpack or belt, so that it is always at hand when you really need it.

In the box:

pliers

crimper
