

UV Filter PGYTECH for DJI AVATA (Professional)

Ref: 6970801338999

UV Filter PGYTECH for DJI AVATA (Professional)

PGYTECH UV filter for DJI Avata

The PGYTECH UV filter is dedicated to the DJI Avata and blocks blue light. It is made of aircraft-grade aluminum and tempered glass, resulting in light weight and durability. Its installation will take you just a moment, and special protective coatings protect against damage and repel liquids.

High image quality

The UV filter prevents UV rays from entering the lens. It also blocks blue light, so you can easily eliminate unwanted blue or whitish tones from your photos. Thus, the product will be great, for example, when photographing open spaces such as seas or vast fields. The filter will also allow you to avoid unwanted glare, while maintaining vivid, natural colors.

Robust construction

The PGYTECH filter is coated with a multi-layer coating that repels water and grease, which will make it easier to keep clean. What's more, it is scratch-resistant, so it will last you a long time.

Designed for DJI Avata

The filter weighs just 1.35 grams, and its frame is made of CNC aircraft aluminum, so it won't affect your drone's flight. What's more, it's

corrosion resistant and is a perfect fit for the DJI Avata.

Manufacturer

PGYTECH

Model

P-36B-010

Type

UV

Compatibility

DJI Avata

Material

aluminum, optical glass

Weight

1.35 g
