Mini wireless projector BYINTEK K16Pro

BYINTEK K16Pro mini projector

Feel like a movie theater in your own home or garden. The BYINTEK K16Pro LED projector can handle 4K resolution and displays images up to 150" diagonal. It is also distinguished by its wide compatibility and 2 built-in 5W speakers. The projector allows vertical and corner keystone correction, and its brightness reaches 300lm. The device offers Android 9.0 and allows you to conveniently use platforms such as Netflix.

It will prove itself in various applications

Now you can easily watch movies in the garden, show your friends your vacation photos and even play games on the big screen. The K16Pro projector projects a 40-150" image from a distance of 1.2-4.7m. This means it's perfect for small rooms, larger rooms and even outdoors. Create your own home theater, freely give presentations in the office or beat records in your favorite game!

Wide compatibility

Get even more freedom. The projector is equipped with several different ports - for example, you can use audio output (mini jack 3.5 mm), HDMI and USB interface. So, for example, you can connect your PlayStation 4 console, USB drive (up to 32 GB), tablet, phone, laptop, DVD player, and even a game controller, mouse and additional speakers. The possibilities are truly vast!

See even more

With the BYINTEK K16Pro you will see every detail and give yourself an unforgettable experience while watching movies or playing games. The projector will provide you with a large, clear and detail-saturated image. Its native resolution is 1920x1080 Full HD, but it can also support 4K (via cable). What's more, the device lets you adjust the zoom with the remote control and allows you to manually adjust the focus.

Android 9.0

The projector runs Android 9.0 and supports both Wi-Fi 2.4G/5G and Bluetooth 5.0, so you can freely install apps, use the Google Chrome browser and watch movies available on Netflix, YouTube or Hulu. The projector also supports wireless connection and offers support for Multi Screen, Mirror Screen, Miracast, Airplay and DLNA (via the Eshare app).

Remote control included

You no longer need to get up from your comfortable chair to use the basic functions of the projector. The set includes a practical remote control with which you can operate the device from a distance! Using it, you can, for example, turn the projector on or off, adjust the volume, change settings, go to the homepage, use the application or mute the speakers.

Even more possibilities

Enjoy not only a high resolution image, but also excellent sound quality. The projector is equipped with 2 speakers of 5W each, so it will give you the level of immersion you've been dreaming of while watching movies or gaming. The projector also allows corner and vertical trapezium correction, so you can easily eliminate errors resulting from its incorrect positioning. In addition, the device's LED lamp is distinguished by a lifespan of up to 30,000 hours.
