

Mouse and keyboard combo Omoton KB066 30 (Silver)

Ref: 6975969180008

Mouse and keyboard combo Omoton KB066 30 (Silver)

Omoton KB066 Silver (silver) keyboard + mouse set

Make your work easier. This practical set by Omoton was created with Apple device users in mind - it includes a 78-key equipped keyboard and a mouse that allows 3-step resolution adjustment up to 1600DPI. The devices connect to a tablet or laptop via Bluetooth and provide comfort of use. They also feature a lightweight, portable design.

Compatible with your devices

The included devices are compatible with iOS 13, iPadOS 13 and newer operating systems, among others. You can easily pair them with, for example, iPad Pro 12.9, iPad mini 5 and more. You can also pair them with other Bluetooth devices such as laptops and computers. What's more, the devices guarantee fast and stable transmission with a range of up to 10m. Delays, interference and other signal quality problems are a thing of the past!

Portable design - comfort of use

Both devices included in the set are distinguished by their lightweight, portable design. Thanks to this, they can accompany you almost anywhere - they will easily fit into a backpack or laptop bag! What's more, both the mouse and keyboard provide comfort of use and are equipped with quiet buttons. This means that you can easily use them, for example, in a library or a cafe - don't worry that the sounds of clicks will disturb someone!

Long working time

One AA battery is enough to power the mouse, and the keyboard requires two AAA batteries (not included). Don't be afraid of having to replace them frequently - they will provide a surprisingly long working time. What's more, after 10 minutes of inactivity, both devices go into sleep mode. This makes them more energy efficient! To wake them up, just press any button and wait a while.

Convenient to use keyboard

The keyboard you'll find included is equipped with 78 keys with scissor switches. As a result, it guarantees smooth, comfortable operation and fast response time. It also offers special multimedia buttons that will allow you, for example, to quickly adjust the volume or stop playback. It is also distinguished by its ergonomic design. The built-in stand makes the keyboard tilt at an 8° angle, and additional anti-slip pads ensure that it won't slide on the desk surface.

Universal mouse

The set also includes a universal computer mouse, which is perfect for a variety of applications. It allows 3-stage resolution adjustment in the range of 800 / 1200 / 1600DPI, which means that you will successfully use it, among other things, at work, during ordinary Internet browsing, for photo editing or even during a game. What's more, the device fits perfectly in your hand and is very comfortable to use.
