

## Laptop stand Omoton LD02 (Silver)

Laptop stand Omoton LD02 (Silver)

Ref: 6975969180053

### Omoton laptop stand LD02 (silver)

Do you use your laptop on a daily basis, connecting an additional monitor and keyboard to it? Or do you want to make it easier to store your chosen devices? The Omoton LD02 double stand will help you with this! It will help you properly organize your desk space and easily keep things in order. You can also adjust the width of its compartments in the range of 14-42mm. The product is extremely durable and compatible with 4-17,3" devices.

### Reclaim your desk space

The stand allows you to store up to two laptops or other devices vertically. By setting them up this way, you will save space on your desk and gain more space! It's ideal if, for example, you often plug in an external monitor to your MacBook or want to charge your iPad. This will easily keep you organized and make your work more comfortable!

### Wide compatibility

The accessory is compatible with most laptops, tablets and smartphones with a diagonal of 4-17.3". So you can, for example, put your MacBook and smartphone in it. It is also possible to adjust the width of the stand's compartments (14-42mm) with the included allen wrench. This way you can easily adjust it to fit your chosen devices tightly and ensure their stability.

#### Improved construction

A high-grade aluminum alloy was used to make the stand, which was CNC machined, sandblasted and brushed. This makes the accessory extremely durable and scratch-resistant. At the same time it presents itself extremely stylish - it has almost the same texture as the surface of the MacBook. All this means that the product will not only serve you well, but also decorate your desk!

#### Unparalleled stability

Do not worry that the device placed on the stand will fall over or be damaged. The accessory is equipped with a wide, heavy base, making it extremely stable. What's more, there are silicone non-slip pads inside and on the bottom, which protect your laptop from scratches and prevent the product from sliding on the desk surface.
