Universal remote control / BroadLink RM4 Pro control unit

Ref: 6924826708435

Universal remote control / BroadLink RM4 Pro control unit

Broadlink RM4 Pro universal remote control

The Broadlink RM4 Pro universal remote control allows you to control devices in your home using 433/315 MHz radio waves or IR. With easy control via an app, you can control your TV, lights, blinds, air conditioning or audio devices even when you're away from home. It is compatible with Alexa and Google voice assistants. Its compact size allows you to place it anywhere, and its stylish, modern and minimalist design will fit into any interior.

Easy control

In addition to turning appliances on and off remotely, using the remote control, you can also set a timer tailored to your lifestyle for the ultimate in convenience. In addition, the device has the ability to create so-called scenes to run multiple devices simultaneously with a single click.

Control away from home

If you're away from home, you can turn appliances on and off via the app, according to your needs. With the app, you can also check whether the selected device is on or not. Everything is done in real time.

Immediate response

Mobilemax - Gadgets and Accessories
Rua Vasco da Gama n61, 8005-411, Estoi - Faro, Portugal
(Continente)

In addition, it is possible to buy an additional humidity and temperature sensor, the use of which, allows you to measure the temperature and humidity in your home, allows you to read the data provided, and even program a response to too high temperature or too low humidity.

A worthy successor
The Broadlink RM 4 Pro is an improved and enhanced successor to the extremely popular RM3 Pro. In addition to improving and adding basic functions, the RM4 Pro also features a newer design that is much more in line with the latest trends. In addition, RM4 Pro includes the ability to connect a temperature and humidity sensor to give you even more options.

Power and stability
By using 433 MHz RF in the remote control, the device will perform well even in larger areas, and the IR beam works at a range of 8 to as much as 15 meters.
