Earphones Soundpeats Air 3 Deluxe HS TWS (black)

TWS Soundpeats Air3 Deluxe HS Earphones (black)

Do you care about the best possible sound quality? The Soundpeats Air3 Deluxe HS earphones won't let you down - they guarantee high-end sound, as confirmed by Hi-Res Audio certification. They are equipped with 14.2-millimeter drivers and support LDAC codec. They connect to devices via Bluetooth 5.2, and thanks to built-in microphones with ENC, they allow you to talk freely on the phone. There is also a dedicated app that provides access to a number of interesting features.

Great sound quality

Take your musical experience to a new level. The Air3 Deluxe HS earphones will surprise you with fantastic high definition sound quality. They support LDAC codec and stand out with large 14.2mm drivers, so you can enjoy incredible richness of detail and deep, powerful bass. With Soundpeats in your own home, you'll feel like you're at a concert!

Reliable connection - low latency

Discover a new and better wireless transmission quality. The earphones use advanced Bluetooth 5.2 technology to give you a stable connection in almost any situation. The Air3 Deluxe HS is also a great option for gamers - it offers a special gaming mode with a latency of only about 60ms. Perfect synchronization of video and audio will make it easy to find yourself in the world of your favorite game, quickly locate incoming opponents and not be surprised!

Excellent sound also during conversations

With Air3 Deluxe HS, you can talk freely on the phone even in extremely noisy places. Each earphone is equipped with 2 microphones that will perfectly register your voice. They also support ENC noise cancellation technology, which effectively filters out up to 80% of unnecessary background noise. All this gives you the assurance that you and your callers will hear each other without any problems - even if you answer the phone in a crowded supermarket or bus.

Tailored to you

The Air3 Deluxe HS earphones fit perfectly in your ears and are extremely comfortable. Their operation is made easy by built-in touch panels, with which you can, for example, stop playback, change mode, activate the voice assistant, switch a song, answer the phone or adjust the volume. Now everything you need is at your fingertips! What's more, the earphones detect whether you have them in your ears. If you take them out, they automatically stop playback and resume when you put them back in.

Check out what the app offers

Install the free SoundPeats app and get more options. With it, you can, for example, adjust the volume, select the playback mode, check the earphones' charge level, turn the touch control on or off, and update the firmware. EQ settings are also available - adjust them to your expectations and enjoy an even more interesting experience!

Long runtime

Listen to your music at home, at work or while traveling without worrying about your earphones draining too quickly! The Air3 Deluxe HS can run for up to 5 hours on a single charge. In addition, the included case allows you to extend this time to about 20 hours. So you can listen to your favorite songs or watch YouTube videos without any interruptions.
