Magnetic car holder with induction charger Mcdodo CH-7071 (black)

Magnetic car holder with inductive charger Mcdodo CH-7071 (black)

A charger that makes life easier with. The extremely strong magnet holds your phone in place no matter what the conditions, and with the swivel head you can position the screen any way you want to increase your comfort while driving.

Extraordinary pulling power

The reinforced magnet, whose design is identical to the magnets built into iPhone 12s, ensures that your smartphone sits perfectly in the mount and won't slip even during hard braking or off-road driving.

No more restrictive cables

Wireless charging will make it easier to use navigation while your phone is charging. The mount is mounted on a swivel head, so you can position your phone any way you want - horizontally or vertically, as well as change the angle of your phone.

Instant charging

The McDodo CH-7071 charger uses 15W/7.5W power, so it will charge your phone in no time. A smart chip influences the voltage adjustment and also controls the temperature height, preventing overheating. The device also features short-circuit, overcurrent, and overcharging protection, so you can rest assured that your phone is completely safe.

Easy installation

The device offers two mounting methods. Thanks to the universal fastener, you can easily mount it in most standard air vents, or on the cockpit with an arm enriched with structural adhesive that won't leave a trace on the mounting site.

It will adapt to you

The CH-7071 is compatible with MagSafe systems. It's adapted to work with the iPhone 12, but if you use the McDodo or Apple MagSafe magnetic case in addition, you'll get even better traction and expand the range of models you can use the charger with. The McDodo case is available for iPhone 8-12 series, Huawei Mate 30 series, Mate 30 Pro/P30 Pro series, as well as Xiaomi 10/10 Pro/11 phones.

Kit includes:
