

### Car holder with induction charger Mcdodo CH-7620 (black)

Ref: 6921002676205

Car holder with induction charger Mcdodo CH-7620 (black)

#### McDodo Space Series 15W car charger

The McDodo CH-762 is a fast-charging, wireless car charger with built-in smartphone recognition and a mirror array to dissipate excess heat. It has a number of safety features to keep your device completely safe. The charger has two mounting options, so you can easily mount it where you are most comfortable. It meets global standards for Qi-type chargers, so it is fully compatible with phones from well-known manufacturers.

#### It will take care of your phone

The charger has a smart clasp with a built-in battery capacitor, so as soon as you turn it on, the arms of the holder open to securely plug in your phone, after which it is instantly charged. What's more, when you turn off the engine, the CH-762 will beep accordingly, so you don't have to worry about forgetting to take your phone with you when getting out of the car.

#### Multiple security features

The McDodo CH-7620 has an improved integrated mirror panel that efficiently dissipates heat, preventing your phone from overheating. It features protection against overheating, short circuit, overcurrent, overcharging, and also recognizes other items.

#### Easy installation

The device offers two mounting methods. Thanks to a universal fastener, you can easily mount it in most standard air vents or on the cockpit with a suction cup. The sturdy mounts will keep your phone in place even on rough roads, and the swivel arm will give you the freedom to position the screen while driving.

#### Clear display

The panel clearly lets you know what mode the charger is in. When turned on, a white logo appears on the panel, making it easy to plug in your phone even in the dark. A red light shows standby mode, a blue light means your phone is charging, while no light says the device is off. The McDodo charger has added protection so that the device will automatically turn off if it detects another object.

#### Wireless, instant charging

You don't have to worry about your phone discharging on a long trip. The CH-7620 charger will charge your phone to 50% in one hour. Using 5/7.5/10/15 power, it works with smartphone brands Apple, Samsung, Huawei, etc. It has a Type-C input, making it compatible with most available chargers.
