

Landing Gear Extensions PGYTECH for DJI Mini 2 SE / Mini 2

Ref: 6970801335813

Landing Gear Extensions PGYTECH for DJI Mini 2 SE / Mini 2

Elevated landing gear for DJI Mini 2 SE

The elevated landing gear effectively increases the drone's adaptability to the ground during takeoff and landing, minimizing the risk of damage to the gimbal and the bottom housing of your drone. The elevated chassis raises the device by 25mm, and weighs just 18g and does not affect the drone's in-flight behavior.

Quick installation and removal

Thanks to the solutions used in the accessory, you can instantly mount or dismount it without worrying about damaging or scratching any of the arms. There is no need to remove the elevation to assemble the drone, allowing for easy transportation without disassembly.

Shock reduction

The excellent quality materials used in the production of the landing gear are characterized by very high shock absorption. As a result, they reduce the drone's susceptibility to damage even during an emergency landing.

Manufacturer code

P-12A-012

Plastic

PA66 + GF, Silicone

Weight

P: 3.5 g x 2; T: 5.5 g x 2

Compatibility

DJI Mavic Mini ; DJI Mini 2 ; DJI Mini 2 SE

Price:

€ 14.99
