Temperature & Humidity Meter Habotest HT607

Habotest HT607 temperature and humidity meter
The Habotest HT607 meter can measure humidity, ambient temperature, dew point and wet thermometer. It will therefore prove useful in places such as a laboratory or warehouse. It is equipped with an LCD screen that displays measurement results in real time. It is distinguished by its fast response time and shuts down automatically after a certain period of time to save energy.

Precise measurements - easy-to-read display
The device's probe is equipped with a sensor that allows precise measurements to be taken in a short time. The results are displayed in real time on a large, easy-to-read LCD screen - thanks to the backlight, you can use the device comfortably in almost any conditions. The meter will also notify you of minimum and maximum values. It is also possible to change the °C/°F units.

Thoughtful design
The product is powered by three AAA batteries, which you'll find included, and placing them inside the device won't be a problem - just remove the back cover. In addition, the use of durable materials ensures resistance to damage. Additional protection is provided by the probe cover, and operation is facilitated by dedicated buttons.
