Digital Anemometer Habotest HT605

Ref: 5905316141032

Digital Anemometer Habotest HT605

Habotest HT605 digital anemometer

Habotest HT605 is a practical digital anemometer that allows you to measure wind speed, wind temperature and wind volume. It is equipped with an eight-bladed windmill and allows you to adjust the measurement units. It is powered by 3 AAA batteries (included), and will also remind you when the battery level is low. Meanwhile, the LCD display will provide you with the most important information about the device's operation.

Efficient operation

The anemometer has a windmill consisting of 8 blades and a sensor, which is responsible for short response time and efficient operation without interference. As a result, you are assured of accurate measurement results. You will use the product to measure wind speed outdoors, in the laboratory, or when inspecting the ventilation system. What's more, 3 AAA batteries (included) are responsible for powering the HT605.

Simple operation - handy design

Using the HT605 is simple and convenient. The anemometer is equipped with buttons, with which you can select the measurement unit and adjust the operation of the device to your needs. You can choose from: m/s, km/h, mil/h, ft/s and even knots. You can also use MAX/MIN and change °C/°F. The LCD screen displays key information in HD quality, and thanks to its lightweight and handy design, you
