

Parking heater HCALORY HC-A02, 8 kW, Diesel, Bluetooth (gray)

Ref: 5905316141209

Parking heater HCALORY HC-A02, 8 kW, Diesel, Bluetooth (gray)

Parking heater, diesel heater + bluetooth Hcalory HC-A02 (gray)

Get ready for colder days and provide yourself with a reliable source of heat. Diesel heater Hcalory HC-A02 will be perfect for example when you are traveling - it will allow you to warm up at a standstill and make it easier to remove frost from the windows of the vehicle. It is equipped with a 5-liter fuel tank and is distinguished by low combustion of about 0.1-0.35l/h. As a result, it will last you a long time! The device features wide compatibility, and you can also operate it via an app. It also has a built-in LCD screen.

Bet on universal solutions

The heater is compatible with a wide range of 12V / 24V vehicles and is distinguished by its relatively small size. This means that it will be ideal, for example, for heating vans, cars, campers and even trucks. It will also allow you to quickly get rid of frost from the windows. You will also successfully use it when you are stationary. What's more, thanks to its adjustable power of 5-8kW, you can easily adjust its operation to your needs. You can also adjust the temperature in the range of 8-36°C.

Reliable operation

The HC-A02 heater uses volatilization technology. This means that the fuel is heated and vaporized into gas by a ceramic spark plug.

Also noteworthy is the fast ignition of the device. The product also features relatively low combustion, which reaches about 0.1-0.35l/h. As a result, it can provide a long operating time! The fuel tank has a capacity of 5l - enough to let you warm up during a stop or defrost the windows.

Safety of use

When designing the HC-A02 heater, safety was also taken into account. The device has been protected against short-circuiting and overheating, and has been given an intelligent control system. In addition, it can stably maintain power at the right level. At the same time, the product is environmentally friendly - it is characterized by low emissions, so much less pollution enters the air.

User-friendly

Operation of the device will not cause you any problem. The heater is very easy to assemble and disassemble, and it has been equipped with an LCD display that will allow you to conveniently check the most important information about its operation. You will also find a remote control included, with which you can conveniently operate it. The range of the remote control is up to 100m! The device also has handles that make it easy to carry, as well as specially designed feet that will allow you to set it stably on a flat surface of your choice.

Smart operation

It is also possible to conveniently control the heater using an app - the product connects to your smartphone via Bluetooth. You can also automate its operation and enjoy the optimal temperature in almost any situation! Set the device to spontaneously start working when the temperature drops below a set value, and stop it once it has heated the space to a certain level.
