Transmitter FM XO BCC03 Bluetooth, QC 3.0, 2x USB, 18W (black)

XO BCC03 FM Transmitter Bluetooth, QC 3.0, 2x USB, 18W (black)

FM transmitter is a practical device that will be useful for every driver. The transmitter allows you to play music, as well as make secure phone calls. It is equipped with 2 USB ports, with the help of which you can easily restore power to your smartphone or tablet. The Bluetooth 5.0 module is responsible for a fast and stable connection. It also stands out for its wide compatibility.

Fast charging

The device is equipped with up to 2 USB ports. The USB QC 3.0 port will allow you to instantly renew energy in various equipment. In turn, the second USB port allows not only standard charging, but also connecting a USB flash drive. With the transmitter you can easily charge your smartphone, tablet or wireless headphones.

Many possibilities

The transmitter allows you to conveniently play your favorite music from a smartphone or portable USB drive. All you have to do is plug in a flash drive or connect to it via Bluetooth and select the right frequency on your car radio! You can also use it to freely answer and reject calls, change the frequency, adjust the volume or control the music player.
