TELESIN 3-Way tripod TE-TRP-009

Telesin 3-Way TE-TRP-009 selfie-stick tripod

The Telesin TE-TRP-009 is a multifunctional accessory that works well as a selfie stick or a tripod with an extension arm. You can unfold it to a length of up to 55cm or use it as a simple stabilizer. The built-in ball joint allows you to freely adjust the tilt and rotation of the device placed on the tripod, and the ergonomic, portable design provides comfort and allows you to have the product always at hand.

Ref: 6974944460616

### Wide compatibility

Use your favorite devices without obstacles and enjoy fantastic recording results. The tripod is equipped with a special adapter and features a lifting capacity of up to 300g, making it compatible with many popular models of sports cameras and smartphones. Note: for phones and some cameras, you will need an additional mount or frame (sold separately).

### Practical tripod with boom arm

Make it easy to record original videos, vlogs or tutorials. Simply unfold the tripod's legs and place it on any flat surface. The accessory is equipped with non-slip silicone pads, which give it stability and prevent it from moving. What's more, the extendable boom with adjustable joints gives you even more freedom and allows you to place the camera in any position.

#### Take the perfect selfie

The accessory will also work perfectly as a selfie stick - all you have to do is fold down the tripod's legs. You can also adjust its length in the range of 22-55cm, making it perfect for different scenarios. Now you can easily take the perfect selfie! An additional advantage of the accessory is the ergonomic handle, which fits perfectly in the hand and is very pleasant to the touch.

#### Even more adjustability

Get an even more interesting perspective and record from any angle. The accessory is equipped with a ball joint that allows you to freely tilt the camera mounted on it and rotate it 360°. Experiment with different settings and create even better shots!

#### Always at hand

Going on a trip or to a party? Take the accessory with you and take lots of fantastic photos! When folded, the product is only 22cm long - it will easily fit in your bag or backpack. In the set you will also find a special lanyard, with which you can, for example, hang the selfie stick on your wrist.
