

Bike light Superfire BL12, 4800mAh, USB

Bike light Superfire BL12, 4800mAh, USB

Ref: 6956362995277

Superfire BL12 bike light

The bicycle light with two LED lights will keep you safe on the road, and also serve as a handy flashlight in any conditions. It is waterproof and has drop protection up to a level of 1 meter, and with a USB port you can easily refill its battery. It is equipped with a standby mode, on which it can operate continuously for 8.5 hours.

Seven modes of operation

The SuperFire BL12 has two types of lights - short and long. In different configurations, they offer seven levels of operation. Short lights at light and strong levels, as well as in SOS mode, and long lights, giving a wider and longer beam of light, which you set at light or strong levels. The last two modes are long lights low and long lights in SOS mode.

Safe driving light

The convex lens makes the light an ideal road light. It is designed not to dazzle drivers and pedestrians, so it provides complete safety while driving at night, not only for you, but also for those you pass.

Universal charging and convenient operation

It has a USB input and an on-off button that simultaneously indicates the charge level. In addition, the BL12 is handy and weighs little, so

it can also serve as a flashlight.

Easy and quick installation

This bike light is extremely easy to install, and thanks to the detachable mount, you can quickly take it with you when you need a light away from your bike.
