

TELESIN Fast charge box +2 battery for GoPro Hero 9/10/11/12

Ref: 6974944460586

TELESIN Fast charge box +2 battery for GoPro Hero 9/10/11 GP-FCK-B11

Telesin quickcharge dual channel box charger for GoPro Hero 9 / 10 / 11 / 12 + 2 batteries (GP-FCK-B11)

Enjoy fast charging and longer recording time. The included batteries feature a capacity of 1750mAh and are designed for the GoPro Hero 12 / 11 / 10 / 9. With their help you can easily power your camera! Their convenient storage and fast charging is made possible by the dual-channel charger, which you will also find in the package. It supports the PD standard and is distinguished by its durable yet portable design.

Fast charging

Both the included batteries and the charger support fast charging. You don't have to wait too long anymore! Now you'll charge the battery to 75% in about 30 minutes, and to 100% in about 1.5 hours. That's significantly less time than with standard devices. What's more, thanks to the combination of fast charging and 1750 mAh capacity, you only need to charge the batteries for about 30 minutes to gain up to 62 minutes of recording time.

Performance and safety

The included batteries are distinguished by their impressive lifespan - they will serve you well for a long time. Protection against overvoltage, short-circuit and more is also an added advantage. You can also know the current charging status at any time. The charger

is equipped with colored light indicators, which will allow you to quickly check whether the batteries are already charged.

Improved design

High-quality ABS was used for the charger, which is extremely durable and resistant to damage. A non-slip pad on the bottom of the device gives it more stability and prevents it from sliding on the surface of a desk or shelf. What's more, the product's USB-C port is protected by an additional cover, which protects it from dust. Also noteworthy is the practical lanyard, with which you can attach the charger to your backpack and take it with you on a trip to the mountains or a tent.

Convenient charging and storage

The Telesin charger allows you not only to charge batteries quickly, but also to store and transport them. You will also find special compartments for 2 memory cards. Now you can always have all the necessary accessories at hand! What's more, the device is compatible not only with Telesin batteries, but also with original GoPro batteries and with batteries from other manufacturers.
