Wired Gaming Mouse with replaceable sides Delux M629BU RGB 16000DPI

Ref: 6938820409205

Delux M629BU RGB 16000DPI gaming mouse with overlays

The Delux M629BU gaming mouse is distinguished by its ergonomic design, so you can use it comfortably without prolonged use. It also stands out with its RGB backlighting and fully programmable buttons. The optical sensor is responsible for precision, and the included interchangeable base increases the comfort of use.

Customize its operation to suit your needs

The Delux mouse offers special software with which you can customize the device's operation to your liking. Conveniently change the resolution up to a maximum of 160000 DPI or the backlight effects. You can also program all the buttons.

Unparalleled precision

Enjoy reliable mouse performance and gain an edge over your opponents. The Delux M629BU mouse uses the PAW3389 optical sensor and allows you to adjust the resolution up to 16000 DPI. What's more, the sampling rate goes up to 1000 Hz, so you'll achieve another victory.

Thoughtful design

The Delux M629BU mouse is equipped with an Omron optical switch, which is responsible for button life of up to 20 million clicks. The

USB-A cable is extremely lightweight, with a length of 1.8 meters. In addition, you will find a replaceable base included, which will allow you to use the mouse comfortably.
