Solar Flashlight Superfire D30, 310lm, 2000mAh

Ref: 6975515771117

Superfire D30 Flashlight

Provide a reliable source of light in a variety of situations. The Superfire D30 flashlight guarantees stable light during camping, emergency situations, repair work or patrolling the area. It has 6 light modes, and it is charged via a solar panel. It is also equipped with a safety hammer, belt cutter and buzzer. The device is made of durable materials, and thanks to its IP44 protection rating, you can freely use it in almost any conditions.

Tailored to your needs

The flashlight offers up to 6 light modes, so you can easily match its performance to different situations. The modes available are: strong light, light light, strong side light, light side light, red and blue flashing light, and stroboscopic, which offers a bright, high-frequency flashing light.

Even more possibilities

Be prepared for any situation. The D30 flashlight has a built-in steel safety hammer to help you break glass in an emergency situation. It also features a belt cutter and a special buzzer that emits a warning signal. In addition, you can easily attach it to metal surfaces, thanks to built-in magnets. With the Superfire flashlight you can feel safe!

Use solar energy for charging

The device uses energy from the sun's rays to charge - just place it anywhere in the sun. This solution will not only save energy and reduce the cost of bills, but it protects the environment. In addition, you can use the flashlight to charge your smartphone!

Safe and durable

You can use the flashlight in almost any conditions without worry. The device is protected at IP44 level, so it is not intimidated by raindrops. It was made of high-quality materials, which are characterized by above-average durability and resistance to wear and tear. The device is also equipped with a number of safety features that protect against overcharging or over-discharge, among other things.
