Wall charger LDNIO A1306Q 18W + Lightning cable

LDNIO A1306Q 18W mains charger + Lightning cable

Take care of the proper life of your phone with the LDNIO mains charger. The A1306Q provides a power supply of 18W and supports QC 3.0, so you can replenish your devices in no time. Reduced charging time allows you to keep your batteries in good shape, and their complete safety will be ensured by a built-in smart chip that protects them from overheating, short-circuiting and other electrical hazards.

Reliable and compatible

The product is distinguished by its sturdy construction, and fireproof polycarbonate is used, so you don't have to worry about your devices. It is compatible with most equipment from popular manufacturers, so you only need one charger for all of them. You'll also find a Lightning cable included.

Thoughtful design

The A1306Q is small in size, so you can successfully take it wherever you need it. The charger is made of flame-resistant polycarbonate, and a number of electrical protections ensure that the charged devices are fully protected. You don't have to worry about overheating or other hazards.

Included

Power charger
