the pet's attention even better and encourage it to set off in the chase! In addition, the device was created from environmentally safe and durable materials - your pet's teeth and claws will not frighten it!

Intelligent operation

The device is designed in such a way that your cat has enough time to play and rest. Wicked Mouse first works for 10 minutes and then goes into sleep mode. However, it can be reactivated at any time - the cat just needs to touch it, for example, with its nose or paw. Thanks to this solution you can be sure that your pet will not get tired and will not get bored with the toy too quickly.
