

B/DC **D250**

Charger SkyRC D260

Charger SkyRC D260

Ref: 6930460005526

New generation charger with voice function

SkyRC D250 is a two-channel charger with two independent circuits, thanks to which you can charge two types of batteries simultaneously. The charger has a synchronization mode in which the user can apply the same settings for both circuits, saving time on unnecessary configuration. A complete novelty used in the D250 charger are voice messages. The messages inform about the current mode of operation, activation of the charger protection and the next steps during configuration. The messages are available in English. The charger can be used as a lithium battery meter and a resistance meter. There is also an automatic current, temperature and processing time limit, which makes the charger extremely safe.

Power supply for DC devices

The D200 charger converts DC to AC and is capable of powering DC devices up to 150 W. The charger converts 100-240V from the mains socket to 13.8V DC. The kit includes a SkyRC power distributor, which has 3 DC inputs and 2 USB ports to charge your smartphone or tablet.

Two charging ports

SkyRC D250 is an extremely intelligent charger that allows you to charge two different batteries simultaneously. The device also supports power distribution in AC mode, which allows you to distribute power to both circuits according to your needs. Total power for

both channels and DC power is 250 W.

Cooling and compatibility

The D250 charger is an extremely versatile charger that is able to charge all available battery modes including the latest LiHV batteries. The device also has built-in cooling, so I work at full power without heating up.
