Smart plug WiFi Avatto OT02-EU TUYA

Ref: 6976037360100

Smart plug WiFi Avatto OT02-EU TUYA

The Wi-Fi smart outlet allows you to remotely control the devices connected to it. Operation is facilitated by an app (Smart Life, Tuya) and voice commands (Amazon Alexa, Google Home, Yandex Alice). It allows you to create work schedules, set timers and control devices in groups. In addition, it has security features, so you can use it safely.

More possibilities with the app

Now you can access the most important information at your fingertips. The Avatto Wi-Fi smart outlet is compatible with the Tuya and Smart Life apps - from there you can control your devices wherever you are. With just a few clicks, you can turn appliances on/off, set a schedule or adjust settings.

Customize its operation according to your needs

Schedule your smart appliances to work. Through the app, for example, you can set the operation of the coffee maker to prepare coffee at 7:00 a.m., and the lights in your apartment to turn off at 11:00 p.m. when you go to bed. What's more, it's possible to enable a timer that will make the selected device automatically turn off after a time you specify.

Voice control

Another advantage of the OT02-EU is the voice control function. The Avatto smart outlet is compatible with Amazon Alexa, Google Home and Yandex Alice, among others. This allows you to customize the operation of your devices with simple voice commands. You no longer have to get up from the couch to turn off the lights.

Device sharing function

It's also possible to grant other household members access to the OT02-EU. All you have to do is add the selected equipment to the app and share it with other users. As a result, your loved ones can conveniently use the coffee machine or turn off the light when they forget to do so after leaving the house.

Thoughtful design

The Avatto smart outlet is designed to make using it convenient and safe. Thanks to the memory function, the device will register the last used settings in case of power failure. In addition, overload protection prevents damage to appliances, and the group control function makes it easy to use. You can also control the energy consumption of individual devices.

Manufacturer

Avatto

Model

OT02-EU
