

## Smart Pet Snack Machine with Camera Pawbby

Smart Pet Snack Machine with Camera Pawbby

Ref: 6971747870437

### Smart snack feeder with camera - Pawbby

Don't lose touch with your pet, even when you're not at home. The Smart Snack Feeder with Camera by Pawbby will allow you to not only check what your pet is doing, but also give him a command or a snack remotely! The device offers two-way intercom and is equipped with a camera that provides high-quality 1080p video. Convenient operation of the product is enabled by the Xiaomi Home app.

### High quality image

Now you can check what your pet is doing and how it is doing at any time. The feeder has a built-in camera that can provide richly detailed 1080p video at up to 20FPS. What's more, the 130° wide-angle lens guarantees a larger field of view. As an added bonus, infrared technology allows the device to enjoy clear images even at night.

### Built-in intercom

Do you see your pet doing something it shouldn't, such as trying to eat cookies left on the table? Now wherever you are, you can tell him not to do it! The feeder has a built-in speaker and microphone, which allows you to speak back to your pet at any time, call him or, for example, talk to family members present in the house.

### Play with your pet remotely

Are you not at home, but want to play with your pet? Now it's possible! Just turn on the app and call your pet via the feeder. When your pet comes closer, tap "Trick" to reward it with a snack! Play with your pet and train tricks with him - all from a distance!

#### Preserve the most precious moments

Did the feeder camera capture your pet in some adorable pose? Or maybe you managed to record something funny with its help? Don't let such special videos be lost somewhere! The device allows you to save videos on a microSD memory card, in the cloud, as well as via NAS. It is also possible to share the recordings with friends in real time.

#### Easy to use

No more problematic and time-consuming device setup. The Pawbby feeder is extremely easy to use. All you have to do is plug it in and pair it via WiFi! Using it will make it much easier for you with the Xiaomi Home app. With its help, you can, for example, see the camera preview in real time and reward your pet with a snack. You will also receive useful notifications.

#### Carefully thought-out design

There is a special knob on the top of the device, with which you can easily open the feeder and refill the snacks. The product is also very easy to clean. Just wipe it with a damp cloth and then dry it! In addition, the wide base with a fixed cable gives the feeder more stability - don't be afraid of it falling over!

#### Brand
