

Smart socket WiFi Gosund SP1-H (2-pack)(HomeKit) 16A

Ref: 6972391289545

Smart socket WiFi Gosund SP1-H (2-pack)(HomeKit)

Gosund SP1-H smart outlet (HomeKit version)

Take smart home management to a new level. The Gosund SP1-H smart outlet allows you to pair your devices with Apple HomeKit and operate them conveniently from a distance. Group your appliances, control them with your voice and create work schedules for them. You can also share control with family or friends. The set includes 2 smart sockets SP1-H. Type DE - without hole (side earthing)

Service your devices remotely

Want to turn on your air conditioner at home while you're at work? Or maybe you happen to forget to turn off the light before leaving your apartment? It is not a problem anymore! With the Gosund SP1-H smart outlet, you can pair your devices with Apple HomeKit so you can control them remotely - not only at home, but also at work, at the coffee shop, or on vacation abroad, for example.

Create job schedules and timers

Customize your smart home to suit you. The SP1-H smart outlet allows you to create work schedules for selected appliances. So you can make the lamp turn off automatically at the time you usually leave for work, and the heater start working before you get home to let you enjoy a pleasant warmth. Do you want a certain appliance to switch off automatically after a certain period of time? This is also possible! Just set a timer.

Control your devices with your voice

Experience how simple and convenient managing your smart home can be. Thanks to its compatibility with Apple HomeKit, the SP1-H allows you to control selected devices using the Siri voice assistant. You don't have to reach for your phone every time anymore! With just a few words, you can, for example, turn on the air conditioning or turn on the light.

Share control

Your family and friends can also conveniently manage their smart home through the app. All you have to do is share your devices with them! Now your loved ones can easily remotely run the air conditioner, turn off the heater or turn off the lights. With Gosund you will create a smart home where everyone will feel comfortable!

Safety of use

The socket is made of high-grade materials that provide it with exceptional durability. Its casing was made of fire-resistant PC V0 plastic. The product is also protected against overheating and overcurrent, among other things. If necessary, you can also lock it against children. All this makes the SP1-H socket safe for the whole family.
